PITTSBURGH, Aug. 5, 2015 — Art, comedy, and science will combine in Casey Carle’s exciting show, BubbleMania, at Carnegie Science Center on Saturday, Aug. 15 and Sunday, Aug. 16.

The traveling demonstration show features brilliant demonstrations on bubbles of all shapes and sizes. Using a special formula to create unusual bubbles — from bubbles that puff smoke when they pop to bubbles larger than a grown adult — Carle’s show teaches about the science behind bubbles, as well as mesmerizes and mystifies audiences of all ages.

The show will describe how bubbles form, why they’re spherical, how to make a cube bubble, and the science of bubble bursting — each topic related to the physical laws of the natural world. Hands-on activity stations allow visitors of all ages to explore the world of bubbles up-close and personal.

Carle is a trained actor who debuted BubbleMania in 1990. Carle has served as a consultant on soap bubble routines for Cirque du Soleil and has been featured on The Discovery Channel. He regularly performs across the United States and has traveled to Singapore, Mexico, and Japan to present BubbleMania.

BubbleMania shows will be included with general admission. Thirty-minute shows will begin at noon, 2 pm, and 4 pm in the Science Stage both days.

About Carnegie Science Center

Carnegie Science Center is dedicated to inspiring learning and curiosity by connecting science and technology with everyday life. By making science both relevant and fun, the Science Center’s goal is to increase science literacy in the region and motivate young people to seek careers in science and technology. One of the four Carnegie Museums of Pittsburgh, the Science Center is Pittsburgh’s premier science exploration destination, reaching more than 700,000 people annually through its hands-on exhibits, camps, classes, and off-site education programs.

About Carnegie Museums of Pittsburgh

Founded by Andrew Carnegie 120 years ago, Carnegie Museums of Pittsburgh is a collection of four distinctive museums dedicated to exploration through art and science: Carnegie Museum of Art, Carnegie Museum of Natural History, Carnegie Science Center, and The Andy Warhol Museum. The museums reach more than 1.3 million people a year through exhibitions, educational programs, outreach activities, and special events.
