SCIENCE WILL BE BREWING AT CARNEGIE SCIENCE CENTER’S ‘21+ COFFEE’

ADULTS-ONLY NIGHT TO EXPLORE THE SCIENCE OF COFFEE

PITTSBURGH, May 13, 2015 — Science will be brewing at Carnegie Science Center’s next adults-only night – 21+ Coffee, exploring the science behind the beloved brewed beverage. The event will be held on Friday, May 29, from 6 – 10 pm.

Guests will learn about roasting coffee, explore different brewing methods, discover how to taste subtle differences in a cup of joe, and uncover why beans from different parts of the world produce different flavors. Local coffee shops will demonstrate the science behind their favorite brews.

Activities in the BodyStage will focus on coffee “cupping” and how professionals taste and describe coffee flavors. Shows in the Works Theater will explore how roasting and brewing methods affect flavor.

As always, 21+ Night features the chance to experience four floors of hands-on exhibits – with no kids! Exhibits include SpacePlace, roboworld™, and the Miniature Railroad & Village®. Cash bars are located throughout the building, and snacks are available for purchase.

Local group “Ray Lanich Band” will perform in the Robot Lounge.

Cost is just $10 for tickets purchased by noon the day of the event, or $15 if purchased at the door.

For a few dollars more, visitors can watch an Omnimax movie on Pittsburgh’s biggest screen or catch a laser show in the Buhl Planetarium.

Carnegie Science Center’s monthly 21+ Nights are sponsored by Trib Total Media, Bob FM, Q 92.9, and Yelp. The USS Requin submarine and Highmark SportsWorks® will not be open during the event.

For more information or to buy tickets, visit CarnegieScienceCenter.org.
About Carnegie Science Center

Carnegie Science Center is dedicated to inspiring learning and curiosity by connecting science and technology with everyday life. By making science both relevant and fun, the Science Center’s goal is to increase science literacy in the region and motivate young people to seek careers in science and technology. One of the four Carnegie Museums of Pittsburgh, the Science Center is Pittsburgh’s premier science exploration destination, reaching more than 700,000 people annually through its hands-on exhibits, camps, classes, and off-site education programs.

About Carnegie Museums of Pittsburgh

Founded by Andrew Carnegie 120 years ago, Carnegie Museums of Pittsburgh is a collection of four distinctive museums dedicated to exploration through art and science: Carnegie Museum of Art, Carnegie Museum of Natural History, Carnegie Science Center, and The Andy Warhol Museum. The museums reach more than 1.3 million people a year through exhibitions, educational programs, outreach activities, and special events.
