SCIENCE CENTER HOSTS NEXT LATE NIGHT LASER PARTY OCT. 8
PARTY EVENT FOR ALL AGES CELEBRATES THE MUSIC OF THE 1980’S

PITTSBURGH, Sept. 29, 2016 — Carnegie Science Center is continuing a new series of all-ages evening events with the next Late Night Laser party on Saturday, Oct. 8 featuring the music of the 1980s.

Laser ’80s will give party-goers the chance to explore two floors of exhibits and special themed activities. Guests are encouraged to break out the hairspray and build up some shoulder pads as they put together the perfect 1980s fashion statement. Attendees can pose for a selfie “with” their favorite band in front of green screen and see what happens when an electric guitar is paired with the fiery Ruben’s Tube.

The party continues in the Buhl Planetarium as a laser DJ cranks up the volume and blasts the bass for a laser concert complete with fog and out-of-this-world visual effects. The music of the King of Pop comes alive with “ABC,” “Beat It,” and more. Guests will experience dazzling LED lighting and breathtaking liquid sky effects and really feel the music thanks to a brand-new 24,000-watt sound system, one of the most powerful in Pittsburgh.

Members join the party for $7, which includes tickets for one laser show. The cost for non-members is $10. All guests may add on an additional show for just $5.

Laser ’80s Party Schedule:
- 8 pm: Michael Jackson
- 9 pm: That Laser ’80s Show
- 10 pm: Van Halen
- 11 pm: Rock Monsters
- Midnight: Pink Floyd – The Wall

The next party date is Late Night Laser Electronica on Saturday, Nov. 5.
To purchase tickets in advance, call 412-237-3400, then press 7.

**About Carnegie Science Center**

Carnegie Science Center is dedicated to inspiring learning and curiosity by connecting science and technology with everyday life. By making science both relevant and fun, the Science Center’s goal is to increase science literacy in the region and motivate young people to seek careers in science and technology. One of the four Carnegie Museums of Pittsburgh, the Science Center is Pittsburgh’s premier science exploration destination, reaching more than 700,000 people annually through its hands-on exhibits, camps, classes, and off-site education programs.

**About Carnegie Museums of Pittsburgh**

Established in 1895 by Andrew Carnegie, Carnegie Museums of Pittsburgh is a collection of four distinctive museums: Carnegie Museum of Art, Carnegie Museum of Natural History, Carnegie Science Center, and The Andy Warhol Museum. In 2015, the museums reached more than 1.4 million people through exhibitions, educational programs, outreach activities, and special events.
