SCIENCE CENTER HOSTS “ILLUMINATING” 21+ NIGHT!

NEXT NO-KIDS NIGHT FEATURES GLOWING EXPERIMENTS, SCIENCE OF LIGHT

PITTSBURGH, Jan. 10, 2017 — Carnegie Science Center encourages guests to get their glow on at the next no-kids night. **21 + Glow** happens Friday, Jan. 20, from 6 – 10 pm.

Guests will learn about the science of light during this illuminating evening. Along with making glow-in-the-dark slime and learning about lasers, visitors to the Science Center will see how light can be produced from chemical reactions, and have the chance to experiment with fiber optics. Visitors will also explore LED circuits and have the opportunity to have their faces painted with fluorescent face paints. In some experiments, black lights will be used, so guests are encouraged to wear outfits that will glow in the dark.

As always, 21+ Night features cash bars, snacks available for purchase, and the chance to experience the exhibits with no kids! Live music will be provided by “The Virtuals,” the only band in Pittsburgh with a virtual drummer, in the Science Center’s Robot Lounge. Participants get a discount on Omnimax and laser shows that evening.

Proper identification is required, and all guests must show ID at the door. Tickets cost \$12 in advance, and \$17 at the door.

21+ Nights are sponsored by Walnut Capital, Cohen & Grigsby, Wilson McGinley, Macy’s, and Steel City Media.

For more information and to register, visit CarnegieScienceCenter.org.

About Carnegie Science Center

Carnegie Science Center is dedicated to inspiring learning and curiosity by connecting science and technology with everyday life. By making science both relevant and fun, the Science Center’s goal is to increase science literacy in the region and motivate young people to seek careers in science and technology. One of the four Carnegie Museums

of Pittsburgh, the Science Center is Pittsburgh's premier science exploration destination, reaching more than 700,000 people annually through its hands-on exhibits, camps, classes, and off-site education programs.

About Carnegie Museums of Pittsburgh

Established in 1895 by Andrew Carnegie, Carnegie Museums of Pittsburgh is a collection of four distinctive museums: Carnegie Museum of Art, Carnegie Museum of Natural History, Carnegie Science Center, and The Andy Warhol Museum. In 2016, the museums reached more than 1.4 million people through exhibitions, educational programs, outreach activities, and special events.
