MARS: The Next Giant Leap exhibition

When you Visit MARS: The Next Giant Leap at the Science Center, these fun, fact-filled books for all ages will pair great with your trip to the museum.

You can stroll through the Martian Garden, look out the window of a spaceship, drive a rover, and read some good books about Mars, too.

Submarines have been a critical part of U.S. History since the Civil War. The amazing work of science and engineering that has gone into submarine development, as well as the thrilling adventures on which they embark, means that there are thousands upon thousands of stories to share.

Some of the submarine stories in this list are fantastical flights of fancy, and some are true tales from the front lines of World War II. After visiting the USS Requin, stop into your local library and grab one of these selections to keep the underwater adventures going.
